The New-York team is in a bad way, and unless the management takes prompt action, the team's pen cant chances will be gone. Rusie is the only pitcher to be reckoned upon, who is in condition to pitch, and he cannot do all the work. John Ewing is sick, and

AN AMERICAN ELEVEN BEATEN IN SCOTLAND. Fall River, Mass., Aug. 29.—A cable dispatch says that the American football eleven which left this country three weeks ago has been beaten in Lanerk, Scotland, 3 to 0,

The management of the Manhattan Athletic Club evidently intend that the newly made track at the

Manhattan Field shall be all they desire. Upon its com-pletion the question arose as to what the topping of the track should be. As it has been built chiefly for cycling, it has been decided to top it with brickdust. This makes the best surface for cycling purposes. This finishing tauch to a irack already fast, cives the wheel finishing tough to a track already fast, gives the wheel-men of the Manhattan Athletic Club the advantage of one of the best tracks in America on which to hold their first annual bicycle meet. The meet will consist of eleven contests, for which first, second and third prizes will be given, with the exception of the tandem, for which first and second prizes will be awarded. A prize will also be given for new records. No expense is being spared in the arrangements for this meet, and the enthusiasm and energy with which its projectors are imbued insures its success.

The list of contests is as follows: one-mile open handicap, ordinary; half-mile scratch, ordinary; two-mile handicap, ordinary; half-mile handicap, safety; one-mile scratch, ordinary, 2:50 class; one-mile novice, safety; one-mile handicap, safety; two miles, mem-scratch safety for the chambers of the M. TYPHOID FEVER STILL SPREADING DAILY.

Seventy cases of typhoid fever is the record in Newark for the week ending at noon yesterday. For the previous week the record was forty-eight, showing an increase of twenty cases. During the last week there were seven deaths from typhold fever and one from typhoid malaria. The names of the dead are Anna Giessecki, No. 424 South Seventh-st.; Henry T. Mott, No. 98 West-st.; Agnes Hicks, No. 157 Orange-st. Health Officer Titus said yesterday that a published

list of cases contained a number of names that had not been reported to the Board by physicians, and he declared that if these cases were genuine he would invoke the law and punish these phys'tians for their criminal carelessness. He said the contaminated wells were under the supervision of the Board and that the water was now undergoing analysis. There was only one chemist to do the work, and he necessarily made slow progress. The State Board would however help

Some years ago Dr. Edgar Holden, an excellent authority, made a special investigation of the use of well water in Newark, at the request of the Mutual Benefit Life Insurance Company, and made a chart showing the Intimate connection of various diseases, including typhold fever, with the wells within the ciry. Many of these wells were closed by the authorities, but it appears that their use was resumed after. The people in the neighborhood of the wells have been advised by health board officials that the water drawn from their was safer for use than the aqueduct water. There is no unusual prevalence of typhoid in Jersey City, which draws its aqueduct water from the same source as Newark and has it contaminated with Newark sewage.
